# XLIFF Tool

This tool allows you to maintain the translations of your extensions. Once translations have been captured, they can be saved and reused in other projects. The tool is intended for developers and translators. For further information, questions and details please do not hesitate to contact our support.

You can upload original XLIFF files from your Visual Studio Code project or Microsoft Lifecycle Services translated files. New fields and labels can be uploaded and automatically translated by the existing standard translations. Finally, you can export your new XLIFF file of your project.
